#### DETAILED ACTION

1. Claims 1-7 are presented for examination.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Sabatier et al USPN (6754708).

As per claim 1, Sabatier et al teach a computer communication network (fig 1), wherein a computer is specified by an address defined in a telephone network [col. 2, lines 47-66].

As per claim 2, Sabatier et al teach a computer communication network according to claim 1, wherein the address defined in the telephone network is used in place of an Internet protocol address [col. 6, lines 6-45].

As per claim 3, Sabatier et al teach a computer communication network according to claim 1, wherein the address is a telephone number [col. 3, lines 21-32 and lines 58-67].

As per claim 4, Sabatier et al teach a computer communication network according to claim 1, wherein the address is a number in the Integrated Service Digital Network [col. 2, lines 47-57].

As per claim 5, Sabatier et al teach a computer communication network according to claim 1, comprising:

an address server (server 5) for correlatively storing the address defined in the telephone network and a name corresponding to the address [col. 2, lines 20-35 and col. 3, lines 11-32],

wherein the computer on a originating side comprises:
means for inquiring of the address server about the address
corresponding to a name of a computer on a terminating side
[abstract and col. 3, lines 11-32]; and

means for calling the address received from the address server col. 3, lines 33-64].

As per claim 6, Sabatier et al teach a computer communication network according to claim 5, wherein any of the names in the computer communication network is not duplicated nor the same as any of domain names in the Internet [col. 3, lines 11-32].

As per claim 7, Sabatier et al teach a computer communication network according to claim 5, wherein the address server is an exchanger [server 5, col. 3, lines7-10].

#### Conclusion

3. The prior made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yasin Barqadle whose telephone number is 703-305-5971. The examiner can normally be reached on 9:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Burgess can be reached on 703-305-4792. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9306 for regular communications and 703-746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
